* For cement based Colortek finishes, bases are listed as: **(LB) Light Base:** Base 10 | **(DB) Dark Base:** Base 2

[31]

[LRV]: Light Reflective Value

Color Sample

BARN SWALLOW

1C405

Color Name

Color Number

LRV (Light Reflectance Value) for stucco colors measures how much light the color reflects, affecting brightness and heat absorption. Lighter colors have higher LRV, keeping surfaces cooler, while darker colors have lower LRV, absorbing more heat.

Note: The colors displayed are optimized for web viewing purposes only. Always refer to a physical color chart or sample & have a larger sample then applied to your walls “on site” by your stucco contractor for final approval of color.
